

# Natural Gas STAR Partner Newsletter

June 2005

## Welcome

This is the June 2005 installment of a monthly newsletter highlighting Devon's activities in the Environmental Protection Agency (EPA) Natural Gas STAR Program. These monthly installments summarize Devon's methane emission efforts and a specific partner reported emission reduction opportunity that might be of benefit at certain Devon operations.

STAR Reductions Through 2005	
Methane Reduction Activity	Methane Reductions
Central Division	3,710,300
Southern Division	4,794,824
South Texas	2,299,770
Carthage	2,013,341
Groesbeck	481,713
Western Division	2,492,637
Rockies	943,737
Permian	1,548,900
Gulf Division	141,529
Midstream	1,530,214
Total Reductions	12,669,504

### In this Issue:

- Welcome
- Division Status Table
- Annual Reduction Graph
- PRO Fact of the Month

### PRO Fact Sheet of the Month

#### "Install Electric Compressors"

This month, the highlighted PRO (Partner Reported Opportunities) Fact Sheet document is related to the "Installation of Electric Compressors". The attached PRO Fact Sheet feature provides more details about the technology and associated benefits of installing electric compressors.

If you have an idea or recognize an opportunity for a process change or pressure setting to improve efficiencies or reduce venting, please discuss these ideas with your EHS specialist or call Steve O'Connell at (405) 552-4672.
